DETAILED ACTION

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

1. Claims 76 and 77 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No. 6,517,575 to Yang. Details of this rejection can be found in the prior rejection.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1,4,5,9-14, 16,19-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent No. 6,458,152 to Khosravi et al. in view of Yang. Details of this rejection can be found in the prior rejection.
3. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Khosravi in view of Yang, as applied to claim 1 above, and further in view of US Patent No. 6,042,605 to Martin et al. Details of this rejection can be found in the prior rejection.
4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Khosravi in view of Yang, as applied to claim 1 above, and further in view of US Patent No. 6,428,571 to Lentz et al. Details of this rejection can be found in the prior rejection.
5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Khosravi in view of Yang, as applied to claim 1 above, and further in view of US Patent No. 5,824,046 to Smith et al. Details of this rejection can be found in the prior rejection.

Response to Arguments

6. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the intended functions of individual components of the stent, such as occlusion of a vessel) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

7. In response to applicant's argument that the references do not disclose stent elements that perform the same function as disclosed in the application, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 312 F.2d 937, 939, 136 USPQ 458, 459 (CCPA 1963). In this case, applicant has not pointed out specific structural deficiencies of the prior art. Applicant's arguments are based upon different intended functions of the stent components, such as occlusion of a vessel. Even though the references do not disclose the same purposes for the expandable polymer material, stent body, and barrier film, the prior art structures meet the structural claim limitations.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
